Ultravent 150mm Interface Pad
- 5 mm - Part number: 575833
- 10 mm - Part number: 561849

Ultravent 150mm Backing Pad
- Part Number:

Surface preparation is one of the most labour intensive and time consuming phases of the painting process.

ULTRAVENT adds value by saving time and providing a cleaner working environment.

E-SERIES
Electric Random Orbital
- Part Number: 575921 (2.5mm), 575914 (5.0mm)

Mobile Dust Extraction Unit
- Part Number: 591252 (LC30), 599768 (LP645)

Ultravent - Features and Benefits

- Available in multiple Rhynogrip product lines.
- Advanced dust particle extraction.
- Increased efficiency.

- Accessible for all.
- Cleaner working environment.
- Maximise productivity without compromise.
Perfect partner for Rhynogrip abrasive systems

**Ultravent Backing Pad**

The innovative design of the backing pad utilizes patented vent channels to maximise vacuum air flow.

The unique vent channel configuration allows for a quick and easy fixing of the Rhynogrip disc to the pad.

---

**Ultravent Disc**

The cleaner working environment helps keep dust contaminants out of the repair process.

- **The 21 hole** configuration is applied to the Rhynogrip discs in coarser grits P80 – P180.

- **The 57 hole** design is applied to Rhynogrip discs in the finer grits P220 – P2000.

Abrasive loading is minimised while the cut is maintained at its peak throughout the life of the disc.

---

ULTRAVENT Technology

Advanced dust free solution

Indasa has developed a unique and highly advanced dust free sanding solution with the scope to transform the future of machine sanding. The extraction capacity of the new Ultravent system virtually eliminates abrasive clogging, prolongs performance and provides a clean, healthy working environment. The superior dust-free sanding process produces a highly consistent finish, maximises operator efficiency and optimises bodyshop key performance indicators (KPIs).
